

What Do They Call the Big Grass Field on an Orbiting Satellite?

For the first eight exercises, find the length x . For the remaining exercises, find the length needed to solve the problem. Round each answer to the nearest tenth. Cross out each box that contains a correct answer. When you finish, write the letters from the remaining boxes in the spaces at the bottom of the page.

9 At a point 20 meters from a flagpole, the angle of elevation of the top of the flagpole is 48° . How tall is the flagpole?

10 If a rocket flies 2° off course for 1000 miles, how far from the correct path will the rocket be?

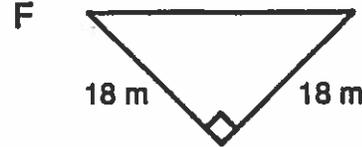

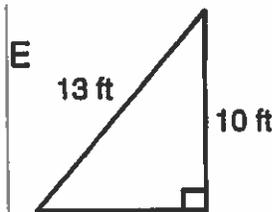

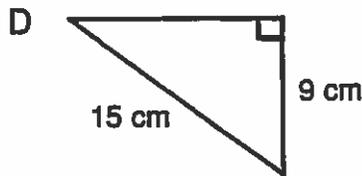

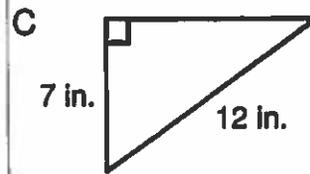

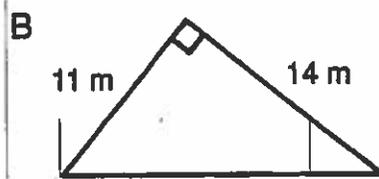

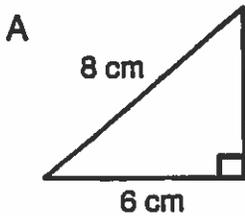

11 As it leans against a building, a 9-meter ladder makes an angle of 55° with the ground. How far is the bottom of the ladder from the base of the building?

What Relation Is a Doorstep to a Doormat?

Round each answer to the nearest tenth (if necessary). Cross out the box containing each answer. When you finish, write the letters from the remaining boxes in the spaces at the bottom of the page.

1 For each right triangle, find the length of the side that is not given.

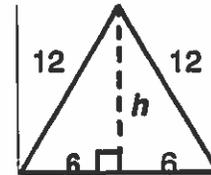

2 Yuki just bought a big-screen TV set. The screen has a diagonal measure of 40 in. If the screen is 32 in. wide, how high is it?

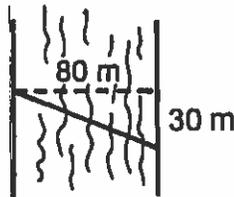

3 A 25-foot ladder is leaned against a wall. If the base of the ladder is 7 ft from the wall, how high up the wall will the ladder reach?

4 Each side of an equilateral triangle measures 12 cm. Find the height, h , of the triangle.

5 A 60-meter river, the current carried him 30 m downstream. How far did he swim?

6 Two jets left an airport at the same time. One traveled east at 300 miles per hour. The other traveled south at 400 miles per hour. How far apart were the jets at the end of an hour?

TO DECODE THE TWO DAFFYNYTIONS ABOVE: For the first nine exercises, find the measure of the angle indicated. For the remaining exercises, find the angle measure needed to solve the problem. Round to the nearest degree. Each time the answer appears in the code, write the letter of the exercise below it.

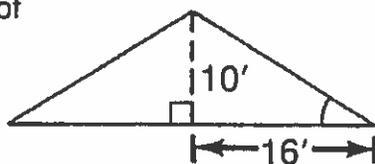

- (L) A driveway is built on an incline so that it rises 3 m over a distance of 20 m. What is the angle of elevation of the driveway?

- (R) Each step of a stairway rises 16 cm for a tread width of 36 cm. What angle does the stairway make with the floor?

- (B) A roof is constructed as shown in the diagram. Find the pitch (angle of elevation) of the roof.

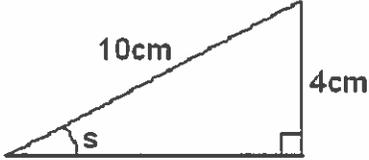

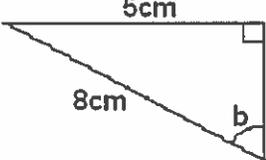

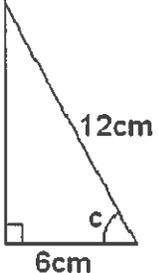

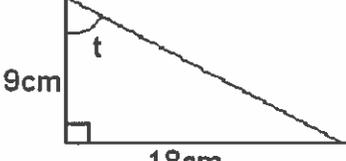

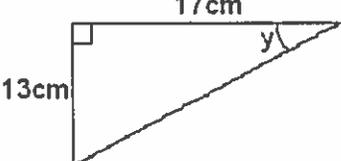

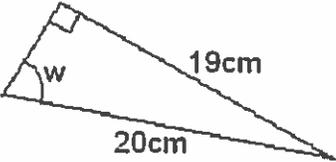

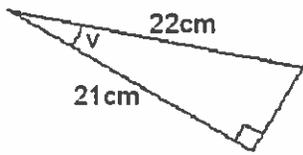

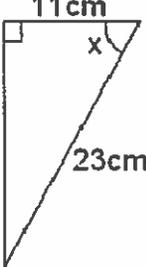

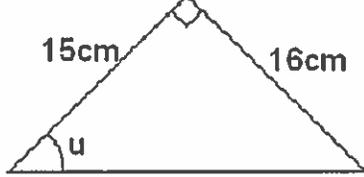

- (T) A train decreases its altitude by 8 m when traveling along 200 m of track. Find the angle of depression of the track.
